ABOUT ME

I'm a builder at heart. Currently a CS junior with a 3.84 CGPA, I focus on the intersection of AI and automation. I don't just want to write code; I want to build intelligent systems that solve actual business bottlenecks. My experience ranges from developing ML-based stress detection tools to full-stack platforms, always with a focus on shipping fast and iterating based on data.

EDUCATION

Bachelor of Science in Computer Science – 6th Semester

CGPA: 3.84 / 4.00

Institute of Business Administration, Sukkur

Intermediate – Grade: A-1

Board of Intermediate Education, Sukkur

Matriculation – Grade: A-1

Board of Secondary Education, Sukkur

SKILLS

Languages: Python (Preferred), Java, JavaScript

AI & Automation: LLM Prompting, Streamlit, API Integration, Machine Learning

Backend & Data: Node.js, Supabase (Database Management), SQL

Prototyping: Figma, Vercel, Git/GitHub

PROJECTS

KitabGhar – Online Book Borrowing Platform

- Architected a full-stack system that **automates** manual borrowing workflows and fine calculations
- Designed an admin 'Control Center' that manages complex state changes, similar to the Campaign Automation Engines used in modern marketing operations
- **Technologies:** React, Supabase, Vercel
- 🐙 [GitHub](#) • [Live Demo](#)

Stress Detection – Social Media Data Project

- Built an end-to-end AI pipeline that processes social media data to identify behavioral patterns
- Deployed a live dashboard using **Streamlit**, proving that raw data can be turned into actionable insights—a logic I'm ready to apply to Competitive Intelligence and Market Activity tracking
- **Technologies:** Python, Streamlit, Machine Learning
- [Live App](#)

Phone Book Application – Data Structures Project

- Java-based application with GUI using Swing
- Implements AVL trees, search algorithms, and other relevant data structures
- Users can add, delete, edit, and search contacts efficiently
- **Technologies:** Java, Swing

Personal Portfolio Website

- Showcases all projects, skills, contact info, and GitHub repositories
 - Built with React, modern UI, responsive design, and interactive elements
 - **Technologies:** React, Styled Components, Framer Motion
 -  [GitHub](#) • [Live Site](#)
-

TECHNICAL INTERESTS

Current Exploration: Investigating how **LangChain** for multi-agent orchestration and **LLMs** can optimize SEO/AEO workflows for competitive intelligence automation.
