ABOUT ME

I am a Computer Science undergraduate with a strong interest in full-stack development and a passion for combining AI/ML technologies with web applications. I enjoy building interactive applications, learning new technologies, and applying data-driven solutions to real-world problems.

EDUCATION

Bachelor of Science in Computer Science – 6th Semester

CGPA: 3.84 / 4.00

Institute of Business Administration, Sukkur

Intermediate – **Grade: A-1**

Board of Intermediate Education, Sukkur

Matriculation – **Grade: A-1**

Board of Secondary Education, Sukkur

SKILLS

Frontend: HTML, CSS, JavaScript, React

Backend: Node.js, Supabase

Programming Languages: Java, Python

Design & UI/UX: Figma, Wireframing, Logical Design Thinking

Tools & Deployment: Vercel, Streamlit, GitHub

PROJECTS

KitabGhar – Online Book Borrowing Platform

- Full-stack web application with user and admin dashboards
- Admin can add/delete books, manage borrow/return requests, track borrowers, and apply fines
- Users can browse books, view details, and borrow them
- **Technologies:** React, Supabase, Vercel
- 🌐 [GitHub](#) • [Live Demo](#)

Stress Detection – Social Media Data Project

- Predicts user stress levels based on social media data

- Built using Python, Streamlit, and deployed online
- Helps understand patterns in social media activity for mental health awareness
- **Technologies:** Python, Streamlit, Machine Learning
- [Live App](#)

Phone Book Application – Data Structures Project

- Java-based application with GUI using Swing
- Implements AVL trees, search algorithms, and other relevant data structures
- Users can add, delete, edit, and search contacts efficiently
- **Technologies:** Java, Swing

Personal Portfolio Website

- Showcases all projects, skills, contact info, and GitHub repositories
 - Built with React, modern UI, responsive design, and interactive elements
 - **Technologies:** React, Styled Components, Framer Motion
 -  [GitHub](#) • [Live Site](#)
-
